

Company profile: HAWE Hydraulik SE

HAWE Hydraulik SE is a responsible development partner with application expertise and experience in more than 70 branches of mechanical engineering. The product range includes hydraulic power units, fixed and variable displacement pumps, valves, sensors and accessories. Electronic components that are exactly attuned to the hydraulic components provide an easy initial operation, precise control and condition monitoring. The intelligent system solutions reduce energy consumption and operating costs. Compact drives save space and allow an innovative machine design. Around 2000 employees in 16 countries and sales partners in over 40 countries provide local, professional and personal support to customers worldwide.

Turnover (2018): 310 Mio. Euro

Number of employees: 2060

Certified according ISO 9001, ISO 14001, ISO 50001, OHSAS 18001
